Devallius & Partners

Functional outdoor environments

Welcome to Devallius & Partners – functional outdoor environments. We are a leading supplier of products for public outdoor spaces. Our focus is to provide functional quality products at competitive prices, always with consideration for a sustainable environment.

With our leading European and Nordic manufacturers, we offer one of the market's widest ranges, including items such as planters and raised beds, self-watering products, and furniture.

Our specialty is delivering customized solutions precisely tailored to your needs.

Additionally, we can provide world-leading solar lighting!

Our customers include municipalities, parishes, land and construction contractors, real estate companies, consultants, and more across Sweden.

Please, feel free to contact us for more information and inquiries.

► Planters

– functional, durable, and available in all sizes.

Our popular range of functional and durable planters can be ordered in various standard sizes, as well as in custom formats and dimensions, precisely tailored to your needs.

The planters are primarily made of hot-dip galvanized steel and can be painted in your choice of RAL colors or made in corten steel.

► Raised Beds and Edging

– customized to your exact needs.

For larger plantings, we tailor-make raised beds and edging precisely to your requirements. Based on plans and measurements, we provide proposals with drawings and prices, always with a focus on function, design, and quality. The products are made of corten steel or hot-dip galvanized steel and can also be painted in your choice of RAL colors.

► Self-Watering

– for all planters and larger plantings.

For all shapes and sizes of planters, we offer our leading range of functional LOG self-watering tanks with substantial water volumes.

For larger plantings, we have efficient self-watering systems with LOG self-watering pipes.

Self-watering provides consistent irrigation for healthy plants throughout the season while saving on labor time.

► Furniture and more

– functional and customized to your exact needs.

For many customers, we deliver functional benches, tables, trash bins, and more from our extensive range, or we tailor them precisely to your requirements. Based on ideas and plans, we provide proposals with drawings and prices, always with a focus on function, design, and quality. Our products are primarily made of hot-dip galvanized steel and can be painted in your choice of RAL colors, or alternatively, made in corten steel. For benches, we offer several environmentally certified materials to choose from.

► Solar Lighting

– world-leading with a focus on sustainability, quality, and function.

In collaboration with our producer Photinus, a world leader in solar lighting development, we can offer efficient and high-quality lighting solutions for parks, pedestrian and bicycle paths, playgrounds, and more. With these products, there's no need for digging and laying electrical cables, making it easy to have lighting where it's needed. No electricity costs, entirely maintenance-free, and the best lighting with consideration for the environment.
